

The SmartSeatPro II

The new evolved, highly adjustable, modular seating system for adults with complex postural and pressure care needs.

CareFlex

SMARTSEATPRO II

The all-new SmartSeatPro II is a highly adjustable modular seating system for adults that takes specialist seating to the next level for those with complex postural management and pressure care needs. The SmartSeatPro II's unique design allows for a range of configurations to ensure postural asymmetries can be fully stabilised, accommodated, and, where possible, corrected from the feet to the pelvis and through the spine to the head.

The SmartSeatPro II benefits from Tilt-in-Space, Back Angle Recline, and a multi-adjustable back and head system with new sections of modifiable filling. The chair's design gives Health & Social Care Professionals maximum adaptability to optimise posture, function and comfort for individuals in all environments, including domestic settings, schools, care homes and hospitals. Operation of chair functions can be by either manual gas action control or battery-controlled motors and a pro-control option. The chair provides high levels of comfort and the robust construction quality associated with CareFlex chairs. The SmartSeatPro II comes with a Lifetime Frame Warranty for extra peace of mind.

CLIENT GROUPS

- Cerebral Palsy
